Is that bugging you?

Looks like an easy fix. Just like it's an easy switch to DeepSeas MDR+.

It's not difficult to switch MDR providers. You can deploy endpoint MDR with DeepSeas in **under an hour**.

? Can your current MDR provider...

- ☐ Cover Operational Technology (OT) along with IT and ALL your attack surfaces?
- ☐ Produce homegrown intel, curate global public intel feeds, and deploy intelligence updates globally in real-time?
- ☐ Allow you to search all your logs within seconds?
- ☐ Detect patterns within your data that have never been seen before?
